## Conn. Farmers Impressed By County Farms

by Everett Newswanger
Staff Reporter

A group of out-of-state farmers visited a leading Lancaster County manufacturing firm and a top local dairy on their way to the Pennsylvania Farm Show in Harrisburg, last week.

After touring the New Holland Machine Company, a bus load of Connecticut tourists arrived at the Gordonville R1 farm of John E. Esh late Monday afternoon to see the big, rugged, full-uddered registered Holsteins that have just completed the DHIA herd average of 18,250 pounds of milk and 645 pounds of butterfat. This makes the fifth herd average over 600 lb completed by

THE PRINCESS AND THE PRINCIPAL — Lancaster County Dairy Princess for 1965, Miss Linda Welk, shown with Frederick P. Sample, supervising principal of Manheim Township High School. Sample delivered a stirring talk on "Today's Youth" to some 400 county farm people at the annual DHIA dinner meeting at the Holiday Inn, Lancaster. L. F. Photo.

## DHIA Banquet Features Educator Discussing Youth And Society; Frey Herd Gets Top Co. Award

"I'm for all education" as an individual Frederick P Sample told an audience of some 415 farm folk at the annual Red Rose Dairy Herd Improvement Association dinner meeting on Thursday "But not to the extent that it overshadows fair play, decency, patriotism, honesty and other moral values"

Sample is supervising principal at Manheim Township High School and well qualified to discuss his chosen topic — "Today's Students"

The most important problem we face with youth today is not teaching them reading, writing arithmetic and all the assorted formal training they will need in later life, Sample said "Somehow we'll get that job done But the big problem is helping each youngster develop as a complete person as an individual "We say we don't want people all the same, and yet we continually cast them all in the same mold," the principal said

We put a child into school and put a statistical number on him He becomes one of the 32 million elementary students in the U S, or one of the 17 million high school students, and we spend 23 billion dollars to keep him there Seventy percent of them will work in occupations tomorrow that are not even listed today. "These are statistics Children don't care about numbers and such. They care about being a part of the world around them. They care about who they are and where they fit in. We must encourage the diversity that is present and

## Crop Adjustment Rates Announced For County

Adjustment payment rates for croplands diverted under the Cropland Adjustment Program have been announced for Lancaster County by Fred G Seldomridge, chairman, Agricultural Stabilization and Conservation County Committee

Payment rates will be related to the value of crops previously grown, and productivity on acreages put into the CAP program.

The adjustment rate for wheat, barley, corn and grain sorghum is 40 percent of the county price-support loan rate, which in Lancster County would be wheat .58 per bushel; barley .36, corn .47, grain sorghum .37.

The chairman also reminded that other cropland on a farm to be included in a CAP agreement will be eligible for adjustment payment rates, varying from $3 00 to $7 00 an acre, depending on the productivity of the cropland Agreements will cover five to ten years

## Extensionist To Discuss Success Of Farm & Home Centers At F & H Annual Meeting Here On Tuesday

The Lancaster County Farm and Home Foundation will hold its annual meeting on Tuesday, January 25, at Hostetter's Banquet Hall in Mount Joy The dinner meeting will begin at 6:45 p m, and is open to anyone throughout the county who is interested in this project

The program will feature an illustrated report by Harold Sweet on some of New York State's more than two dozen Farm & Home Centers Sweet, associate professor in extension administration at Cornell University, is in a position to speak from experience on the progress made and the contribution to the community of an agricultural and homemaking center

The program will also feature a brief business meeting conducted by Foundation president B Snavely Garber,

## See Your Problems As Challenges, Mgt. Specialist Tells Poultrymen

Poultrymen, regardless of location, have individual problems — "but let's call them challenges" — poultry management consultant Joe Claybaugh for DeKalb Agri. Assn. told more than 100 area poultrymen Thursday night at the Lafayette Fire Hall, Lancaster.

"We sometimes get the impression that our competitors are 10 feet tall," the specialist said. He told the poultrymen that he had traveled all over and seen all sizes and shapes of poultry operations. "Believe me, they're not ten feet tall," he said "They just have different challenges than you have."

He illustrated his points with a series of slides showing operations around the country. Some of the multiion-hen plants have their own unique "challenges." Overpopulation. Too many chick-

## Wheat Growers Offered Options

The 1966 voluntary wheat program offers several options to farmers so they can best plan their individual operations, according to the Agricultural Stabilization and Conservation (ASC) County Committee.

The options include planting wheat on all allotment acres; diverting allotment acres from production to conserving uses for payment; overplanting the allotment by up to 50 percent and storing the excess production for bad crop years; substituting

(Continued on Page 6)

## Weather Forecast

**Lancaster County will continue to shiver for the next five days at least, as continuing cold temperatures are forecast with little day to day change. Daytime highs will average about 38 degrees, with overnight lows dipping into the upper teens.**

**We may be cold, but there won't be much of the white stuff to bother with during this period either. Snow is forecast for coastal areas about Sunday night, and flurries over the mountains about the same time. But the weatherman sees little chance for precipitation in our area for the next five days.**

# Weekly Poultry Report

## Eastern Pennsylvania And New Jersey

**WEEKLY SUMMARY**
**LIVE HENS**

Prices on light hens ¼-½c higher. Demand good. Offerings lighter than anticipated & barely adequate. Demand very good for heavy hens. Offerings barely adequate to short. In instances, some quarters unable to secure supplies from outside areas. Few open market roasters 7-8# were priced at 23-26c with no quality or grade deductions. Prices paid at farms: Light Hens 8-9½, mostly 8½-9c; Heavy Hens 21-22½, mostly 21-22c.

## Fogelsville

**January 18, 1966**

(Prices for dock weights, cents per lb. except where noted.)

Hens, light type, range 7½-10, mostly 7½-8½; Hens, heavy type, range 10-23, mostly 15-18; Pullets, range 22-38, mostly 28½-34; Roasters, range 10-27½, mostly 20-27½; Ducks, range 18-36, mostly 23½-29; Drakes, range 22-44½, mostly 35-43½; Turkeys, hens, range 21½-32½, mostly 30-32½; Rabbits, range 25-51, mostly 42-49; Guineas, range, 20½-45, mostly 35½-44; Pigeons (per pair), range 70-80; Jumbo Squab, range, 85.

Total coops sold: 754.

## Delmarva

**January 21, 1966**

Delmarva broiler and fryer live prices remained steady. Demand continued good for moderate auction offerings. Live supplies continued short of needs and lighter than desired in many instances.

Estimated slaughter for Friday and Saturday, 743,000 head, compared to 988,000 last weekend.

In the 24 hour preceding market close on Friday, prices reported paid at farms ranged from 19.7-21.2 cents per lb. on purchases of 911,900 head.

## Eastern Shore Exchange

**WEEKLY SUMMARY**

Broiler and fryer live prices on the Eastern Shore Exchange averaged 20.96 cents per lb. this week, up 2.29 cents over last week's average.

Prices paid ranged from a high of 22.7 cents on Monday to a low of 19.6 cents on Tuesday.

Sales for the week totaled 1,345,800 head, a gain of 200,000 head over last week's totals.

# From Where We Stand . . .

## Laws Are For The Losers

Settlement of the recent public transportation strike in New York City has shown once again that too many of our man-made laws apply only to the weak and to the losers. If you're big enough, strong enough, or have the right "connections" in high places you can flaunt the law at will.

Labor leader Michael Quill has just proved that point again. He publicly defied an injunction against the strike. He even went so far as to tear up the court order in front of the TV cameras, stating that "The Judge can drop dead in his black robes. . . ." Oh, he surrendered to authorities, all right, but never saw the jail. He suffered a heart attack and was hauled off to the hospital.

And he won. The final settlement included dropping of all contempt charges against Quill and his private union. The actions of one irresponsible man were able to stand the nation's mightiest city on its ear, directly affect 10 million Americans who live or work in the City, cause economic losses ranging into the hundreds of millions of dollars and reaching to all corners of the land. And he is above the law because he won.

The days when America can tolerate this misuse of power — can, in fact, tolerate even such a concentration of power in the hands of one man or group of men — has passed. Where the welfare of the general public is at stake, the "strike" becomes an obsolete labor tool. This fact was even confirmed by another aggressive labor leader this week — Walter Reuther. We sincerely hope that he believes his own words. And we hope that in the future the authorities will have the fortitude and the integrity to apply the law to the "bigs" just as promptly and as thoroughly as they do to the rest of us "ordinary" citizens.

## Poultry Future Of The Northeast

For quite some time the indications and predictions have been that poultry and egg production would die in the northeast, and that it would, in fact, move to the areas of lowest production costs.

Poultrymen in the northeast apparently haven't been convinced. According to the January 1966 issue of **NEPPCO News**, the northeastern poultry industry seems to have stabilized. They report that "the decline in all products (eggs, broilers and turkeys), as well as gross income from poultry, has just about leveled off since 1961".

NEPPCO spokesmen go even further in saying that some increase in northeastern poultry production can be anticipated in the future, resulting in the reversal of the long-term downward trend.

We feel this is a reasonable estimate; it will certainly be true at least in the short run. Economists disagree on most things, and one of these is the location of future agricultural production. One school of thought is that it will gravitate to the areas of least cost. The other major school says it will concentrate around the large centers of consumption. Both may be proved right in the long run. But from here it looks as though there will be a future for the poultry industry in the populated east for some time to come. Production methods are changing, and will continue to change, and it is largely because of the change that we feel so certain there will be a good future in the northeast for the poultryman.

## ● Poultry Meeting

(Continued from Page 1)

ens in too small an area The problems, or rather the challenges, often increase at a faster rate than the solutions for many of these operations, he hinted

His illustrated talk covered many of the latest factors in good housing and management such as ventilation, basic housing, construction, insulation, cage population, manure handling, egg gathering, etc He said that the hydraulic method of handling manure had definite advantages at a total cost of approximately 20 cents per bird for installation and operation of equipment

In response to a question from the floor regarding comparative egg production costs between the south and our area, he said that on the average they were comparable. They may have a net advantage of about 1 cent per dozen, Claybaugh said, but they don't match our rate of productivity As they approach our level from that respect, they will also narrow the cost gap.

Bob Scott, administrative assistant from the DeKalb office in Illinois, showed the small gains needed in various factors — shell and interior quality, livability, feed efficiency, longevity, and productivity — to make decided gains in profits on a 10,000-bird operation "Profits in the poultry business are made one egg at a time," Scott said "and good records will show you the way to do it"

Also discussing the subject of record value was Elvin Heil, DeKalb area sales representative He showed slides depicting the quantity of records being kept by his customers, and pointed out the quality of the job illustrated by these records

"Rip" Waugh, DeKalb district manager and master of ceremonies for the meeting, said that records are going to be an increasingly important part of the poultry business of the future.

Lloyd Coover area serviceman for the York-DeKalb Hatchery, pointed out some basics of good management that help to make the firm's extensive pullet-growing operation successful.

## Farmer's Tax Guide Is Now Available

The 1966 edition of the Farmer's Tax Guide is now available, and is reported to be a great improvement over past editions For the first time, it includes filled-in sample forms most used by farmers Each sample entry is numbered for ease in finding the right section for an explanation of how to compute individual entries. The new guide also contains suggestions of ways to keep records in the future.

A free copy of this tax guide may be obtained from the county agent's office, or from the Internal Revenue office Both are in the Post Office Building in Lancaster.

A Social Security Tax Guide for farmers is also available, from the Internal Revenue office, called Circular A. It lists the important changes in the medicare law and in the increase in social security rates.

## Letters To The Editor

Editor,
Lancaster Farming

Dear Sir

Your good column in last issue on water impells me to mail you the enclosed (bulletin on Natural Farming)

Trying to improve on your slogan last line I came up with this — "save a drip and you save all"

John W Hershey
Downingtown, Pa

## God Is Father

**Lesson for January 23, 1966**

**Background Scripture:** Hosea 11:1-4; Matthew 6 9, 11 25-30, John 14:1-11; II Corinthians 1 3, 4, Ephesians 3:14-19. **Devotional Reading:** Ephesians 3:14-19.

MUCH BETTER than reading this column about the Bible is reading the Bible itself. So it will do the reader good to take a Bible and a red pencil and every day this week read one of the six Bible passages, mark it in his Bible and then take time to sit still and think about the meaning of what he has just read. (If this means--reading the passage several times and not only once, so much the better!)

Out of many lines of thought the three following may be selected as showing what a wealth and variety of meaning friends of Christ have found in the "simple" statement: **God is Father.**

### No grandfather

First it may be necessary to clear from our minds the foggy notion that God is a sort of grandfather. Not all grandparents are like their "stereotype," the popular picture made of them, any more than mothers-in-law are like the creatures met with in comic strips under that title. The stereotype of a grandfather is an old man with a beard, probably retired, with nothing to do but pursue his hobbies. Grandpa is supposed to take his grandchildren as a sort of a hobby. They amuse him and he likes to play with them. He lets them do what they please, indeed he feels free to encourage them to dodge their parents' discipline and disobey their rules. In short, a grandfather is interested only in giving his grandchildren a good time. God is definitely not such a grandparent at all — a doddering old deity who lets us do as we please and doesn't really care. God is Father, not Grandfather.

### Father by choice

Many truths are bound up in the basic truth that God is Father. For one thing, He is Father by choice, not by accident or necessity. Down south there is a city where a survey was made of the homes around one of the inner-city churches there. It was discovered that 40% of the "homes" in the area have no adult male in them. You can see what that means in crime and lawbreaking and all the evils that result from fatherlessness in a grim environment. Now all those young "delinquents" had fathers, otherwise they would not exist, but father only in a biological sense. More than half the natural fathers in that area didn't want to be fathers. It was too much trouble, so they skipped out as soon as they could. (Incidentally it does no good to tell those deadend boys that God is Father. Can you wonder?) God is not a runaway father. He does not have fatherhood pushed on him. He is father in two ways: by creation and by grace. We are all his children by creation, and if any — or most — of us are runaway children, that is our fault, not his. We run away from him, never he from us. He wills, he chooses, to be what he is, father of each of us whether we acknowledge him or not. If we live the life of orphans, we need not think God is to blame

### The high God

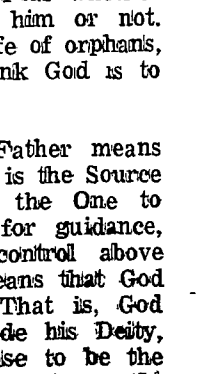
That God is Father means not only that he is the Source of our being, the One to whom we look for guidance, command and control above all others. It means that God is our Father. That is, God does not lay aside his Deity, he does not cease to be the Mighty and Mysterious, the All Powerful, when he is Father. It is not a choice between the intimate Father-God and the infinite and awe-inspiring High God of the Universe. It is precisely the High God, the Ruler and Creator of all that is, who is our Father. The same God to whom Jesus prayed, the same God of whom our Lord Jesus always spoke with such reverence, it is, He and no other and no less, who is the Father of us all.

# Now Is The Time . . .

**By Max Smith, Lancaster County Agent**

### To Wear Your Seat Belt

Seat belts are standard equipment on modern cars but will do little good if the driver does not have it fastened. In spite of how some people might feel about being fastened down to their car, records show that it is much safer to be held in place with a seat belt in case of an accident Many farmers do considerable traveling in connection with their farm business; the use of the seat belt is one safety measure that might help arrive back home and continue farming.



SMITH

### To Make Animals Comfortable

Regardless of the species of livestock animal comfort is necessary in order to obtain maximum, efficient production or gains. The temperature of the barn or pens should be such that the animals are not restless, and the parasite infection so low that little time and feed is expended on trying to become comfortable At this time of the year body lice are at work on many animals; if not controlled, the animal cannot be expected to return a good profit.

### To Make a Will . . . .

Far too many folks have not taken the time to make out a will and make definite plans for the security of the family. Any property owner, and especially a man with a wife and family should see an attorney about preparing a will In case of death without a will, Pennsylvania law would distribute the estate and the immediate family would not benefit as well One need not be old in years in order to need a will, prompt attention is timely, if a will is not already existing.

## ● 4-H Council

(Continued from Page 1)

cil were Mrs. Ivan Eberly, Ephrata R1, northeast district, Mrs J. Witmer Dull, Conestoga R2, southwest district, and to a one-year term to fill an unexpired term, Mrs Clayton Wiley, Peach Bottom R2, southern district.

Elected to two-year terms on the agricultural council were Paul M. Hess, Elizabethtown R3, northwest; Maurice Herr, Refton, southeast; and Fred Lanton, Quarryville R1, southern.

## DHIA

(Continued from Page 1)

possible in our society; we must encourage the individual," the educator told the group.

Samuel A Dum, association president, announced that there were 204 herds enrolled in the county DHIA program that had produced records of 500 pounds of fat, or more. Of these, 17 were recognized as being in the 600-pound plus category. The top dairyman for the 1965 testing year was J Mowery Frey, Jr, whose herd averaged 671 pounds of butterfat, and 15,968 pounds of milk Others in the magic "over 600" class were Paul B Zimmerman, 666; Hiram S Aungst, 649; John E Esh, 645 — Esh led the field in total pounds of milk per cow with 18,254, Furry H Frey, 639, Christ K Lapp & Son, 633, Calvin S Kurtz, 624; Lloyd Wolt, 619, Henry E Kettering, 618, Leon W Hess, 610, Raymond & Louise Witmer, 609, Clarence L Keener, 608, Samuel A. Dum, 605; Amos B. Lapp, 603; Edwin J. Landis, 602; Stanley G. Greiner, 601; John M King, 600.

Unlike last year, there were no 700 pound herds in the county. Last year's top county herd belonged to Furry H. Frey. He was one of three herds in the state with over 700 pounds of fat with a figure of 701.

Awards were presented for the county herds having the high fat score for their respective breed. For Ayrshires this went to James Martin with 507 pounds; Guernsey, Raymond & Louise Witmer, 609, Jersey, William P. Arrowsmith, 543; Holstein, J. Mowery Frey, Jr, 671, mixed, Amos H Rutt, 539.

Dum reported there were 27 county herds under the SNF testing program that had averaged 1000 pounds solids-not-fat A very commendable score, Dum said.

Dexter Putnam, dairy science extensionman from Penn State, told the group that the dairy industry in Pennsylvania accounted for 40 per-

## ● Wheat Option

(Continued from Page 1)

wheat for feed grains or feed grains for wheat; and substituting wheat for oats and rye.

Farmers should investigate each of the options to see which is best for their own farms, ASC says. Full details of the program are available at the ASCS County Office, 1466 Manheim Pike, Lancaster, between the hours of 8 a.m. and 4:45 p.m. The sign-up period extends from January 31, to April 1, 1966.

## ● Conn. Farmers

(Continued from Page 1)

the Esh herd. Two were made on owner-sampler test prior to going on official test three years ago.

"Esh is doing a top job without a lot of fancy equipment," commented Harvey Polinsky, Jewett City, Conn., one of the 35 persons on the tour. "I'm impressed."

Polinsky, himself just finishing a 17,000 lb. HIR average on 65 registered Holsteins, used other words such as "Very good, top production, efficient and clean," to describe the host's operation

Another visitor mentioned the "Lovely condition" of the cows. A third person said he is "Getting the milk out of them."

Russel Hilbard, New London County Agricultural Agent, summed up the feeling of the group concerning our county when he said, "We are dumb-founded at the expanse of fertile land and how neat and trim all the farms are." He pointed out that it was not so much the painted buildings — they have them in Connecticut, too — as the fact that the farm equipment was not setting outside and there was no junk laying around. Another of the group was impressed with the density of the farms. In their part of the country the farms are miles apart and a lot more isolated.

Co-directing the tour with Hilbard was Howard Kenmer, agricultural agent for Middlesex and New Haven counties.

Larry Twigg, local area 10 DHIA supervisor, met the bus at New Holland and guided it to the Esh farm.

The Connecticut visitors planned to reach the Penn Harris Hotel in Harrisburg later Monday evening. They were scheduled to visit the 50th Anniversary Pennsylvania Farm Show all day Tuesday and then start home again about Wednesday noon.

## *DESSERT FLING . . .*

If you're in the mood for something new in the way of desserts, we're at your service. Take, for instance, this Mocha Graham Roll.

**MOCHA GRAHAM ROLL**

¼ cup sifted all-purpose flour
1 teaspoon baking powder
¼ teaspoon salt
14 graham crackers, finely rolled (reserve 2 tablespoons for topping)
4 eggs, separated
¼ cup water
1 teaspoon vanilla extract
½ cup sugar
2 tablespoons butter or margarine, melted
Confectioners' sugar
1 cup heavy cream, whipped and sweetened with 2 tablespoons confectioners' sugar

Sift together flour, baking powder and salt. Combine with graham cracker crumbs. Beat egg yolks with water, vanilla and ¼ cup sugar until thick and lemon colored. Beat egg whites until foamy. Gradually add remaining ¼ cup sugar beating until stiff peaks form. Fold egg yolks into egg whites. Gently fold in crumb mixture. Stir in butter or margarine. Pour into a 15½x10½x1-inch jelly-roll pan which has been greased and lined with wax paper. Spread evenly. Bake in a preheated hot oven (400 degrees) 12 to 15 minutes. Lightly dust a clean dish towel with confectioners' sugar. Invert cake onto towel. Carefully peel off wax paper. Trim off crisp edges. Immediately roll up cake very gently in towel. Fold over about 1 inch at narrow end to start roll. Cool on wire rack. Unroll and spread with whipped cream. Reroll; finish with open end of cake on underside. Frost with Mocha Icing. Sprinkle with reserved crumbs. To serve, slice crosswise. Makes 6 to 8 servings.

**MOCHA ICING**

½ cup instant cocoa
⅓ cup butter or margarine, softened
1½ teaspoons instant coffee
1 teaspoon vanilla extract
¼ teaspoon salt
½ cup sifted confectioners' sugar
3 cups sifted confectioners' sugar
3 to 4 tablespoons milk

Combine first six ingredients. Beat at medium speed until light and creamy. Continue beating; add the 3 cups sifted confectioners' sugar and 3 to 4 tablespoons milk alternately until a spreading consistency is reached.

* * * *

**SUNDAY-BEST COCONUT FUDGE CAKE**

1 tablespoon instant coffee
¾ cup hot water
½ cup cocoa
1 egg, separated (reserve yolk for frosting)
2 cups sugar
2 (3½ ounce) boxes flaked coconut (reserve ¼ cup for garnish)
2 cups sifted all-purpose flour
3 eggs, separated
1 teaspoon baking soda
½ cup commercial sour cream
½ cup butter or margarine, softened
2 teaspoons vanilla extract
1½ teaspoons salt
1 (14-ounce) package fudge and frosting mix
½ teaspoon almond extract
or more to taste

Dissolve coffee in water. Add cocoa; stir to dissolve. Beat 1 egg white until soft peaks form. Gradually add ¼ cup sugar, beating until stiff peaks form. Fold in coconut and 1 tablespoon flour. Beat 3 egg whites until soft peaks form. Gradually add ½ cup sugar, beating until stiff peaks form. Add soda to sour cream. Beat 3 egg yolks, butter or margarine, vanilla, salt and remaining sugar with half of cocoa mixture until light and creamy, about 4 minutes at medium high speed. (Mixture will curdle.) Add sour cream, remaining flour and remaining cocoa mixture. Blend well. Fold in beaten egg whites. Turn ¼ of chocolate batter into a 10-inch tube pan, greased on bottom. Place ½ of coconut mixture on top. Cover with ½ of remaining chocolate batter. Top with remaining coconut mixture and then chocolate batter. Bake in a preheated moderate oven (350 degrees) 1 hour to 1 hour and 15 minutes or until done.

Meanwhile, prepare fud and frosting mix accordi to package directions. Bef cooling, stir in reserved yolks and almond extr Remove cake from ov place on wire rack. Cool co pletely before removing f pan. Frost sides and t Garnish with reserved co nut. Makes 12 servings.

## Farm Women Get Attendance Awards

RM WOMEN NO. 14
iety of Farm Women met Wednesday, Janu- 19 at the home of Mrs. tlan Landis, Ronks Rt. dent Mrs. Lloyd H. k presided with 24 mem- present.

e group sewed 77 can- pads, and reports on the Convention were given Mrs. Joseph E. Nolt, Mrs. John E. Groff and Mrs. Ranck. Contributions of $10.00 each were made to the Lancaster County Tuberculosis and Health Society and the Lancaster County Citizens Scholarship Fund.

Hostesses were Mrs. Landis, Mrs. Charles Micken, Mrs. Raymond Barge and Mrs. J. Clarence Groff.

The group will sew at the General Hospital on February 3 from 9 a.m. to 12 noon, and will entertain Society # 24 at the February 9 meeting to be held at the home of Mrs. Robert M. Esbenshade.

FARM WOMEN NO. 3 SEATS NEW OFFICERS

The Society of Farm Women Group No. 3 held its regular monthly meeting in the auditorium of the Brickerville Fire Co. building recently, at which time the newly elected officers were seated.

Mrs. Harold S. Stuber, program chairman, outlined the program schedule for the year.

February 6, at 12:30 p.m., there will be an "Everybody's Birthday Party" for the members and their families in the auditorium of the Akron Fire Hall.

The regular February meeting was set for the 19th at the home of Mrs. Earl B. Latshaw, Schoeneck.

The following members folded seals at Heart Haven recently Miss Mary Royer, Miss Ada Royer, Mrs Elam Shelly, Mrs Charles Weachter and Mrs. Paul Weidman. Their efforts totaled 21 hours.

Reports were given on the State Convention of the Society of Farm Women by Mrs Donald H Graybill, Mrs. Earl F. Smoker and Mrs. Samuel M. Mohler.

# For the Farm Wife and Family

By Doris Thomas, Extension Home Economist

## Ladies, Have You Heard? . . .

THOMAS

**Some Things To Do When Child Is Ill**

Whenever possible, move an ill child into the den, recreation room, or living room during the day. This provides a welcome change of scenery and often makes it easier to care for him, especially if his bedroom is on the second floor. It also gives him the feeling of not being alone and removed from his usual routines, which often are the major complaints of an ill child.

Books, magazines, portable radio or television, and records will entertain the child while you do your housework. But a word of caution — avoid overloading a sick child's bed with toys.

When confined to bed, a child looks forward to visitors. If his illness is not contagious, let him match wits with a brother, sister, or friend in one of his favorite games.

**Poor Investment**

Household appliances you seldom use are not always a good investment To get full value from the money you've invested, try to use the appliance in as many ways as you can. Also, learn to use and care for each appliance correctly. The manufacturer's instructions that come with the appliance are your best guide for the use and care of his product.

**For Your Records —**

Check stubs are your record of the checks you write. That's why you should fill in the stub each time you write a check Then, if a check is lost or you need to stop payment on a check, you'll have a record of the number, date, and exact amount of it It's worth the time it takes to fill in the stub.

The group heard Bell Telephone Co representative Miss Sarah Martin on the subject, "Famous Women of Pennsylvania."

# WAYNE TAIL CURLER ROCKETS

Yes, that's what the new Wayne-Tail Curler Rockets did for typical early weaned pigs at the Wayne Research Center.

Pigs go for the tasty new Tail Curler Rockets. (3 to 1 over a creep feed formerly considered very palatable.) They get top nutrition from choice ingredients, carefully balanced and fortified to meet the critical needs of baby pigs.

Tail Curler Rockets contain Complex 65, Wayne's Aureomycin, Sulmet and Penicillin combination that gives the difference you can see!

If you don't care to early wean, Tail Curler Rockets will pay off as a pre-starter.

Remember every pound of creep ration eaten means a pound heavier pig at weaning, and a head start that lasts all the way to market.

Harrisburg, Pa. Phone 652-1756 Land Dept.
NOTE: Interested in Buying a Dozen of These Tracts in Various Areas or Counties

## ● DHIA

(Continued from Page 5)

cent of the state's agricultural income. Lancaster County's $27 million dairy productivity accounts for the largest single share of that state total, he said.

Victor Plastow, DHIA advisor, said that every year the county herds are getting a little closer to the goal of 500 pounds fat average. This year's average of 486 pounds represented a gain of four pounds over the preceding testing year. Pounds of milk showed an increase of 128, while return over feed costs increased by $28 per cow.

President Dum introduced the new area directors to the group. They were: Raymond W. Burkholder, District 1; Melvin L. Groff, Dist. 4; John J. Herr, Dist. 7; J. Eby Hostetter, Dist. 10; Daniel Martin, Dict 13; and Allen K. Risser, Dist. 15.

## ● Farm and Home

(Continued from Page 1)

Willow Street R2, with a progress report on the Foundation made by Larry H. Skromme, chairman of the special gifts division of the campaign A report from the building committee chairman Jacob K Kurtz will outline the architect's progress to-date

All local folks are urged to attend this dinner meeting to learn more about the real contribution of a Farm & Home Center, and to give continued support to this important Lancaster County project

Tickets are available from any Board member, from the campaign headquarters in the Farm Credit Bldg., 379 W. Roseville Rd., Lancaster, or from the County extension office in the Post Office Bldg., Lancaster. Noon Monday is the deadline for dinner reservations.

### FARM MECH. COURSE

The Farm Mechanizatron Course being conducted at the Vocational Agriculture Department of Garden Spot High School, New Holland will meet Tuesday, January 25, at 7:29 p.m. to discuss "Mechanical Hay-handling Methods." Mr. Ralph O'Donnel, Product Manager, The New Holland Machine Company, will illustrate and present the economics of several hay-handling pieces of equipment.

Agway

# KETOSIS TREATMENTS

## AVAILABLE IN LIQUID or PELLETS

### AGWAY KETOSIS TREATMENT —

This is a feed grade propylene glycol. Ketosis is a metabolic disease of high producing dairy cows which has plagued dairymen for many years. Most dairy scientists agree that primary ketosis is caused by an acute glucose deficiency. Because propylene glycol when taken into the body is a ready source of glucose, it acts by helping to make up this deficiency. Propylene glycol is used in Agway's Ket-A-Way feed for prevention of ketosis, but there is a real need for propylene glycol in liquid form for either prevention or treatment of the early stages of ketosis. **Agway Ketosis Treatment** will be available in one-gallon plastic bottles and in 55-gallon drums on special order.

### AGWAY KET-A-WAY

Agway Ket-A-Way is an all-pelleted, high energy feed that has been found to be the most effective Ketosis treatment and preventative on the market. It has these factors found to be effective in treating and preventing Ketosis. They are High Energy Propylene Glycol, Cobalt, and High Protein.

### High Energy —

Ketosis basically is a dietary energy deficiency. Ket-A-Way helps to make up for that deficiency.

### Propylene Glycol —

Ket-A-Way contains 5% propylene glycol, the latest and most successful aid in the prevention and treatment of Ketosis. Propylene glycol has been found as effective . . . and in some instances even more effective, than lactates or propionate. At the same time it has none of the palatability problems of these other two items.
